💼 PROFESSIONAL EXPERIENCE

Web Software Engineer, Luminance [🔗](#)

Sep 2022 – Jan 2024 | London, UK

- Developed front-end components for single-page app, collaborating across teams for efficient debugging and testing.
- Led a small team towards the complete overhaul of company website, tested and deployed while coordinating with Marketing.
- Provided mentorship to new team members, sharing deep insights into the codebase and best practices, fostering rapid onboarding and professional development.
- Tech used:
 - Typescript and Backbone.js
 - Git and Gitlab
 - PostgreSQL

🎓 EDUCATION

MEng Aeronautics & Astronautics, Spacecraft Engineering, University of Southampton [🔗](#)

Oct 2017 – Jun 2022 | United Kingdom

- **Grade:** 2:1 (equivalent to B in Norway)
- **Relevant Units:**
 - Advanced Computational Methods
 - Introduction to Machine Learning
 - Spacecraft Orbital Mechanics
 - Design and Computing
- **Projects:**
 - **Y4 Group Design Project:** Designed, built, and tested an unmanned Downwind-Faster-Than-the-Wind vehicle. Led the design of the propeller hub capable of a variable pitch for the blades, and planning and conducting the wind tunnel tests. Produced the python script to read, clean and analyse the data from the sensors.

🏠 OTHER EXPERIENCE

UoS Skydive Club, Vice-President

Sep 2019 – Jun 2022

- Leadership experience from being the Vice-President and Public Relations Officer of the University of Southampton Skydive Club.
- Developed resilience from adapting to challenges introduced by the pandemic.
